SEPTIAN CESARE ARDEN

Information Technology | Software Development

Grobogan, Central Java, Indonesia | tsep265@gmail.com | +628962141010 | Linkedin | Github | Portfolio

PROFESSIONAL SUMMARY

Informatics Education graduate with a GPA of 3.90/4.00 and hands-on experience in software development through internships, projects, and academic activities. With a broad foundation in web and mobile application development (Laravel, React, and Flutter), computer networking (TCP/IP, routing, and wireless). Experienced in web and mobile application development and teaching software development, networking, and project management to 80+ vocational students. Demonstrates strong problem-solving, analytical thinking, communication, and teamwork skills, with the ability to learn quickly and adapt to new technologies and working environments. Open to Software Developer, Software Engineer, and IT-related roles.

PROFESSIONAL EXPERIENCE

Web Developer Intern *January 2025 - February 2025*

Dinas Pertanian Kabupaten Grobogan

- Developed a company profile website using Laravel and Filament and implemented an Open Journal System (OJS) for the Prasarana dan Sarana Pertanian division, covering institutional information display and a full scientific publication workflow (submission, review, and publishing).
- Coordinated with the local Communication and Informatics Office (Diskominfo) on server deployment requirements and handed off the completed system to the division's IT staff for production rollout.

Project Coordinator & Educational Technology Developer *March 2025 - July 2025*

MBKM PTIK UNS

- Coordinated a team in planning and implementing a community engagement program that integrated Virtual Reality (VR) and Internet of Things (IoT) technologies into digital learning activities for 10 elementary school students in Grades 3-6.
- Developed the program curriculum, learning objectives, and activity plans, and designed and developed a VR-based educational application to introduce IoT concepts through interactive, game-based learning.
- Delivered instructional materials and guided students through hands-on projects, facilitating their understanding of IoT concepts and the technologies applied in their learning activities.

Teaching Assistant Intern *September 2025 - November 2025*

SMKN 2 Surakarta | Software and Game Development Program

- Delivered software development, project management, and networking material to 2 classes (approximately 80 students) in the Software and Game Development program.
- Designed lesson plans and hands-on project assignments that improved students' practical understanding of basic web development, basic networking, and project management, evaluated through weekly practical assessments and a final semester exam.

EDUCATION

Bachelor of Education in Informatics Engineering *2022 - 2026*

Universitas Sebelas Maret (UNS), Surakarta, Indonesia | GPA: 3.90 / 4.00

Relevant Coursework: Structured Programming (A), Object-Oriented Programming (A), Data Structures and Algorithms (A), Database (A), Web Design (A), Web Programming (A-), Advanced Web Programming (A), Software Engineering (A), Computer Network Administration (A), Computer Network Security (A-), Wireless Network (A-), Operating Systems (A-), Computer Network Engineering (A), Cloud Computing (A), Mobile Computing (A), Interactive Multimedia Design (A), Educational Software Development (A), Artificial Intelligence for Education (A), Data Mining (A), and Internet of Things (A-).

CERTIFICATION

Junior Web Programmer - 2025
LSP UNS / BNSP | Credential ID: 62019 2513 5 00000069 2025

PROJECTS

LMS - Learning Management System: A centralized platform for managing courses, learning materials, assignments, and student activities, built to support a more structured digital learning experience.

GlobeUpdate - News Portal: A mobile-first news platform bringing together news from multiple categories with a simple interface for browsing and reading on the go.

KasoemFinance - Point of Sale: Developed to streamline daily sales operations, from product management and transaction processing to maintaining organized business records.

E-Commerce Platform: An online shopping platform where users can explore products, manage their carts, and complete purchases through a straightforward, user-friendly flow.

VR + IoT - STEM Learning: Combines immersive VR with IoT-based temperature detection to introduce students to real-world technology concepts through an interactive STEM learning experience.

TECHNICAL SKILLS

Languages: PHP, JavaScript, TypeScript, Dart, Python, Java

Web: Laravel, Filament, Tailwind CSS, React.js, Next.js, Node.js, REST API

Mobile: React Native, Flutter

Database: MySQL, SQLite, Firebase, SQL Querying & Reporting

Networking & Infrastructure: Computer Networking (TCP/IP, OSI Model, Routing Protocols, DHCP, VPN), Packet Switching Networks & Routing Algorithms, Wireless Communications, Network Security, IoT & Wireless

Tools: Git, GitHub, Postman, Trello, Sourcetree, Vercel Deployment, Microsoft Office

Professional Skills: Team Leadership & Project Management, Direct Client & Stakeholder Communication, Cross-Functional Coordination, Technical Reporting, Requirements Gathering, Fast Adaptability Across Technical Domains

SOFT SKILLS

Problem Solving, Analytical Thinking, Team Collaboration, Communication, Adaptability, Project Management

ACHIEVEMENTS & ACTIVITIES

- Grand Finalist, Pitching Competition - FEB Sustainable Business Summit 2023: presented a technology-based business idea.
- Top 5 Finalist, TDC for Startup Bootcamp and Competition: gained experience in product development, business validation, and pitching.
- Finalist, ByteFest 2024 Website Design Competition: demonstrated skills in web design, UI design, and digital creativity.
- PIM (Pekan Ilmiah Mahasiswa) - Karsa Cipta: developed a mobile learning application for Javanese language education as part of a student innovation program.
